

**Global  
Foundation  
For Children  
With Hearing Loss**

# **Building Capacity to Support Children With Hearing Loss in Vietnam**

**Paige Stringer  
Founder and Executive Director**

# Vietnam At A Glance:

- **Population: 87.8 million (World Rank: 13)**
- **GDP: \$123.6 billion (+5.8% annual) Rank: 56**
- **Average age: 27.8**
- **Life expectancy: 72.4 years**
- **Literacy rate: 94% (96% men, 92% women)**
- **Religion: none (80.9%), Buddhist (9%), Catholic (7%)**
- **Fertility rate: 1.9 children/female**
- **Birth rate: 16.8 births/1000**
- **Children under 5 underweight: 20%**
- **Physician rate: 1.2/1000 (Rank: 82)**
- **Average Annual Salary: \$2,220 USD**

# Pediatric Hearing Loss in Vietnam

- Estimated 1.4 million children under 18 with some degree of hearing loss (WHO, 2009)
- Leading factors: Rubella/meningitis, Low weight, Premature birth
- No universal newborn hearing screening. Only “at risk” population is tested
- No government or insurance funding for hearing aids/cochlear implants

# Pediatric Hearing Loss in Vietnam

- Most children identified with hearing loss at 2 years. Age of identification is dropping as awareness grows.
- Pediatric hearing tests conducted at hospitals in HCMC and Hanoi.
- Phonak, Starkey, Widex, Siemens –most common pediatric HA brands. Med-El, Cochlear – CI brands.

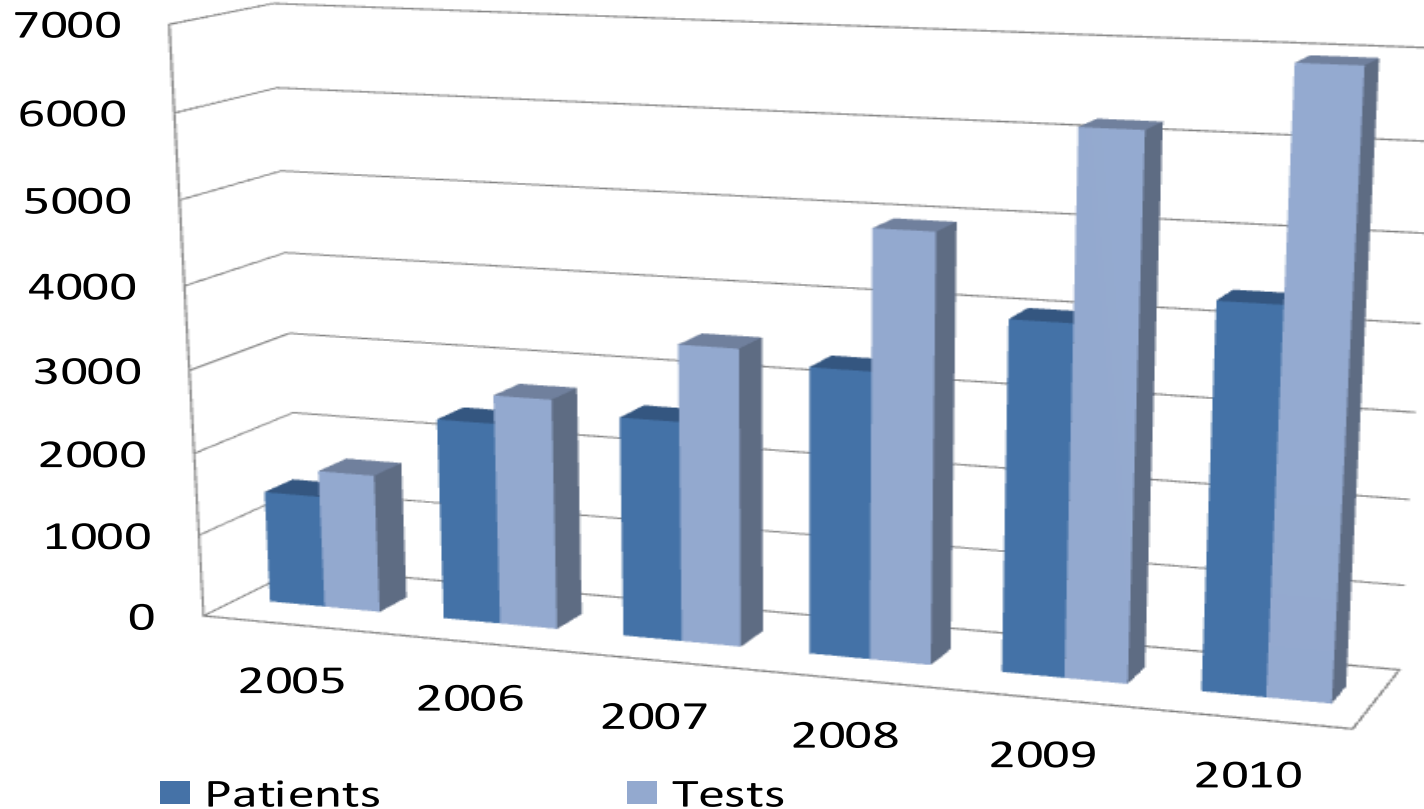

# Audiology Opportunity Areas

- Not enough trained ENT doctors and audio-technicians to meet rising demand for audiology and ear care support.
- Audiology services are concentrated in the cities, making it difficult for families in outlying areas to get timely service.
- Appropriate hearing aids and cochlear implants still a financial difficulty for many families.
- Audiology equipment sourcing, calibration, ongoing care continue to be issues.

# Growing Count of Pediatric Patients and Tests at Children's Hospital 1 in Ho Chi Minh City

**Over 4,000 children and babies tested annually at CH1. Increases in staffing has not kept pace with growing patient counts due to lack of trained professionals and resources.**

# Education Support For Children With Hearing Loss

- Deaf schools provide education from Grade 1 – Grade 9 (some areas, end at Grade 5).
- No opportunity for advanced degrees. Vocational training has led to little success in employment.
- Government deaf schools not funded for kindergarten or early intervention. Some schools offer it anyway – Thuan An Center, Long An for example.
- Private deaf schools and clinics more likely to offer kindergarten and/or early intervention programs.

# Education Opportunity Areas

- Vietnam's Inclusive Education Policy. Mixed results for hearing impaired children due to lack of widespread early identification, early intervention, and access to appropriate hearing technology.
- Teachers and therapists have general education or special education undergrad degrees but little expertise in teaching children with hearing loss specifically.

# Global Foundation For Children With Hearing Loss

## *Mission Statement:*

Provide deaf and hard of hearing children globally with access to the hearing technology, support services, and education they need to achieve their full potential in hearing society.

# Deaf Education Program: Cornerstone of our Work in Vietnam

## Purpose:

- Provide Vietnamese with expertise to help children with hearing loss make use of hearing technology and learn to listen and talk.
- Address gaps in hearing health care and early education support.

## Scale :

- 38 schools for the deaf across 20 Vietnam provinces, 3 hospitals.
- Doctors, technicians, teachers, therapists, families

## Collaboration:

- Global Foundation, Thuan An Center for Disabled Children, Ho Chi Minh City University of Education.
- Launched July 2010.

# Deaf Education Program: Cornerstone of Our Work in Vietnam

## **Multi-disciplinary approach:**

- Curriculum covers audiology, speech therapy, early intervention, auditory-verbal deaf education.
- Same participants enrolled over time to ensure progress.

## **Sustainable:**

- Participants advance thru multi-year curriculum.
- They train others in our program and in their communities to make the benefits exponential and sustainable.

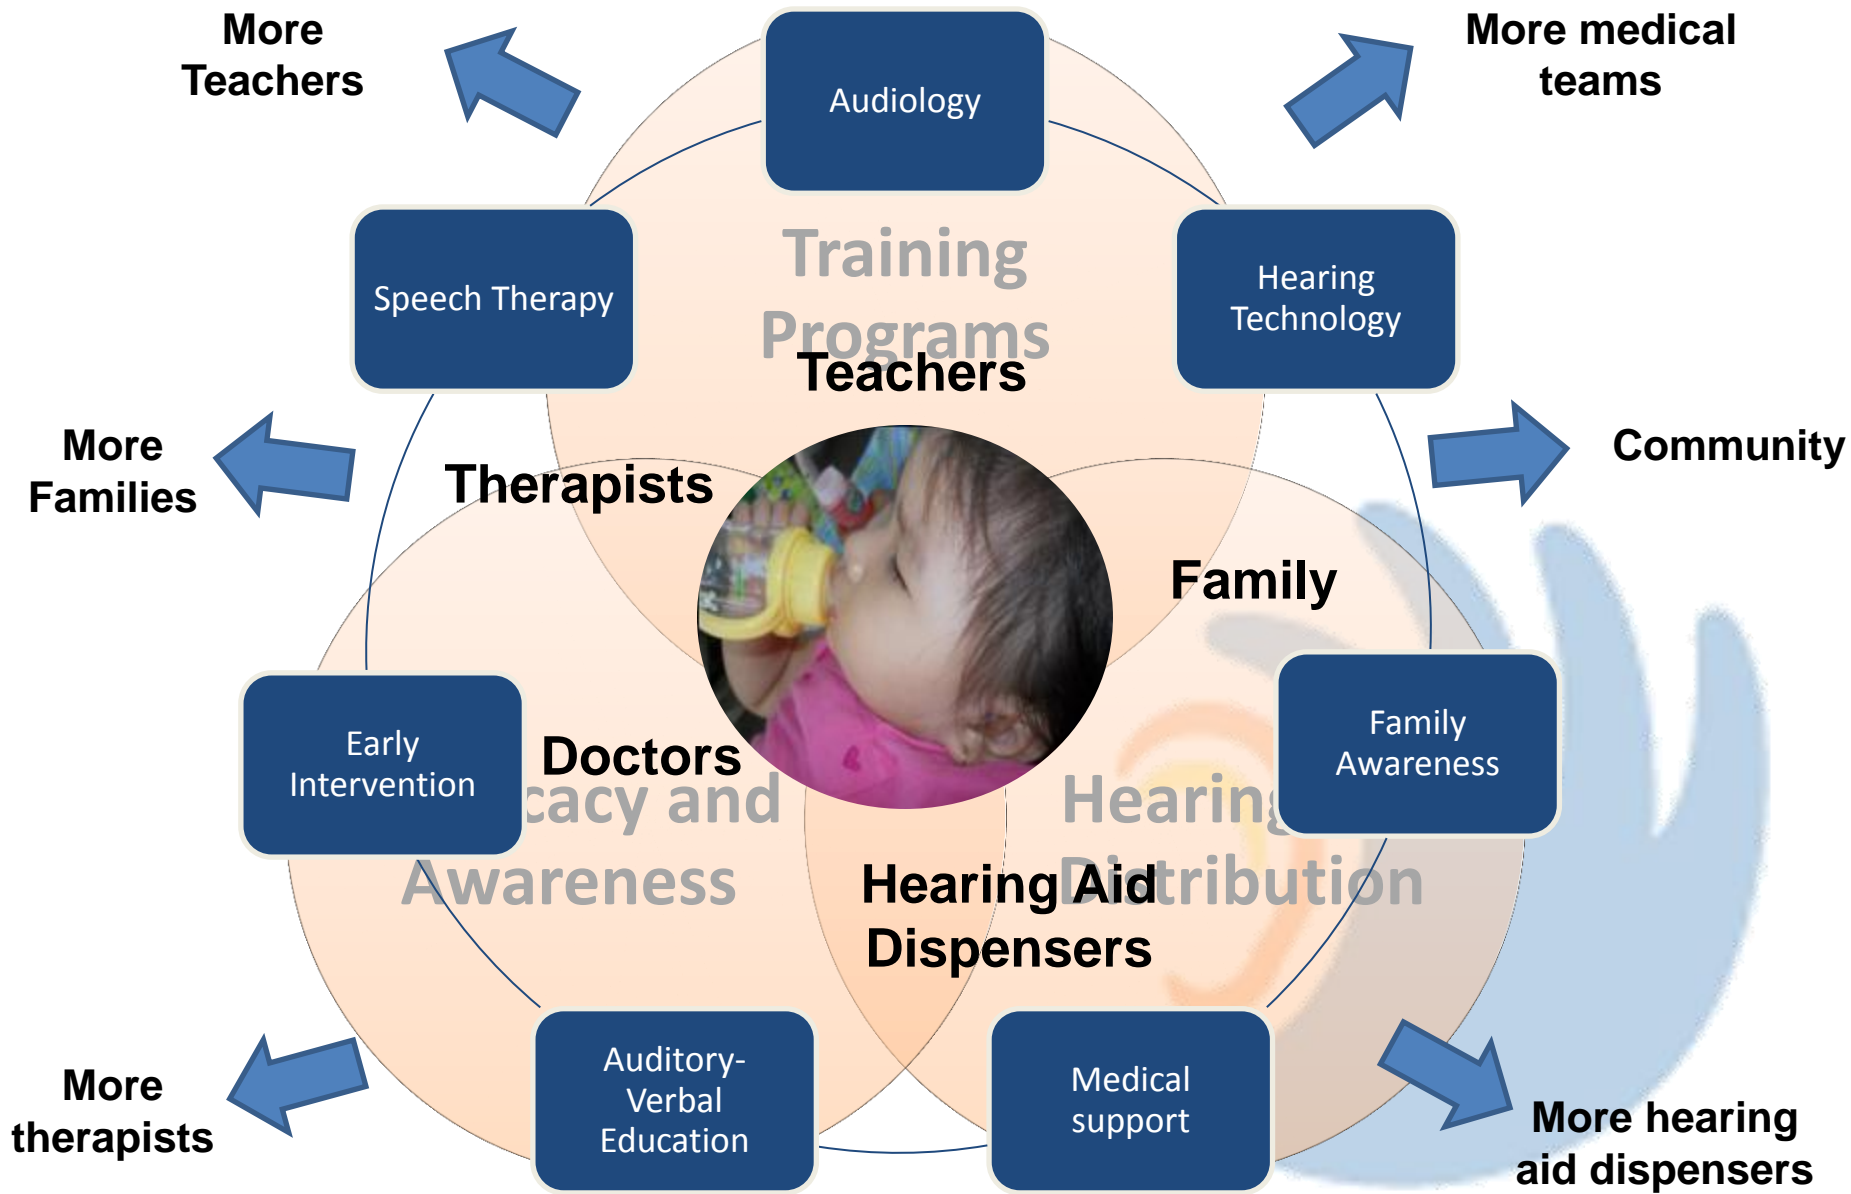

# Global Foundation for Children with Hearing Loss – Professionals

- Team comprises of 38 volunteer professionals from USA, Hong Kong, Singapore, Canada.
- Represent expertise in audiology, speech pathology, early intervention, and deaf education.
- Global Foundation team works together and with Vietnamese throughout the year. Travel to Vietnam to teach the curriculum.

# Vietnam Deaf Education Program: Multi-Faceted Approach

- **Summer Training:** Participants travel from 38 schools, 3 hospitals to Thuan An Center for annual Summer Training. Global Foundation professionals develop curriculum, travel to Vietnam to teach material.
  - **Mobile Missions:** Global Foundation professionals visit schools and hospitals during year to re-enforce summer training in audiology, speech pathology, early intervention, AV deaf education.
  - **Video Analysis:** Provides support for Vietnamese teachers and therapists throughout the year.
  - **Hearing Aids:** Hearing testing and hearing aid fitting incorporated into Audiology training. Children are monitored over time.
  - **Parent training and consultations** provided in all programs.
- 

**More Children With Hearing Loss Learn to Listen and Speak**

## Program Impact in 3.5 Years:

- 4 summer programs
  - 4 Mobile Missions
  - 220 teachers
  - 270 families
  - 125 other professionals trained
  - 38 schools and early intervention centers
  - 3 hospitals
  - 203 hearing aids fit on children during Audiology training
- 
- Program has affected over 1,000 children.
  - Vietnamese participants share learning with each other, making benefits exponential -- and sustainable.

# What's Next....

# What's Next: Audiology Regional Centers

- Addresses need for pediatric audiology care in communities outside of Ho Chi Minh City in South Vietnam.
- Three sites out of the 38 schools enrolled in its Deaf Education Program to serve as regional audiology centers. Eventually could expand to include up to 15 locations.
- Program provides training and equipment to support educational audiology for schools in a given region. Complements existing services in HCMC.

# What's Next: 2014 Summer Program

- July 7 – August 8, 2014
- Over 100 Vietnamese professionals and families to participate in audiology and education tracks.

# How you can help....

# Opportunities to Get Involved

- Video editing
- Marketing materials
- Website
- Data entry and analysis
- Fundraising and outreach
- Make a donation – over 97% of donations go directly to our programs.

# Thank You!
